Re: Registration of Application Number: **12SW3281**; NPDES Number: **MDR003281**

Dear MAUREEN KOTLAS:

This letter will serve as notification that your NOI has been accepted for registration under the General Discharge Permit for Storm Water Associated with Industrial Activities, Permit No. 12SW for stormwater discharges into **the Anacostia River-02140205**. Keep this for your records and provide it to your local jurisdiction as required by the permit. A copy of the permit and this letter should also be kept with your SWPPP onsite. The permit may be printed from MDE's website or from this link <http://9nl.at/MD-SWGP>.

In signing the NOI and providing your updated SWPPP you have certified your agreement to comply with the terms of this permit for the facility **University of Maryland, College Park**, located at **7901 Regents Dr, 1101 Main Administration Bldg, College Park, MD 20742**. Your facility's permit coverage is identified by Registration Number **12SW3281**. This coverage will continue until December 31, 2018, or as extended, under the terms of the 12-SW permit.

You should thoroughly review the permit to make sure you are always in compliance with its requirements. Those requirements include, but are not limited to, selecting and implementing the specific control measure for your industry, performing quarterly visual monitoring requirements, performing the annual Comprehensive Site Compliance Evaluations. The permit also has triggers and requirements for corrective actions.

Your facility discharges into a watershed which is impaired for the following categories: Bacteria, Ions, Nutrients, PCBs, Pesticides, Stream Modifications, Sediments and Trash. Based on this status you must evaluate your control measures to ensure you are minimizing your facility discharges relating to these impairments during each annual comprehensive site compliance evaluation. See Part V.A.2 of the permit.
